

# THE ADVANCED TECHNICAL CREDIT PROGRAM

---

## How to Use the ATC Articulated Course Crosswalk

The content-enhanced high school courses listed in the following ATC Course Crosswalk have been found to be substantially equal to the introductory-level college courses indicated. Statewide teams of secondary and postsecondary subject area faculty compared the Texas Essential Knowledge and Skills (TEKS) for each high school course with the course descriptions, syllabi, and expectations of courses found in the postsecondary Workforce Education Course Manual (WECM).<sup>1</sup> These courses are most often used in technical certificate and degree programs at public community and technical colleges, including Tech Prep programs.

**ATC Course Numbers and Abbreviations** – ATC statewide-articulated secondary Career and Technology Education (CTE) courses are identified with unique PEIMS service ID/course numbers (which include the letter “T”) and course abbreviations for technical placement courses (which include the notation “-TP”).

**“A” Special Explanation Course Code** - All courses eligible for college credit by statewide and local articulation are identified on the high school transcript (Academic Achievement Record, AAR) with the special explanation course code “A.” This code helps participating colleges identify courses taught with enhanced content for award of articulated college credit.

*Although the primary purpose of the ATC Course Crosswalk is to provide guidance to colleges in the award of technical (workforce education) college credit for ATC statewide-articulated high school courses, under specific circumstances colleges may elect to award academic transfer credit from the postsecondary Academic Course Guide Manual (AGCM) for selected courses.*

# Using ATC Statewide-Articulated Courses in High School Graduation Plans

This table shows how ATC statewide-articulated career and technology courses can be used as core courses and electives in high school graduation plans.

Electives	<i>All ATC statewide-articulated courses.</i>

Beginning school year 2002-2003, public schools electing to offer ATC statewide-articulated courses must use the new Career and Technology – TP PEIMS course numbers and abbreviations listed in PEIMS code table C022 (updated March 2004).

When school districts use these course numbers, they must be able to verify that:

- 1) Course content is enhanced beyond the required TEKS with standardized college course competencies (linked to the on-line ATC course crosswalk; effective 8-15-04);
- 2) Teachers have met required faculty qualifications and have completed TEA-required ATC staff development for each course taught; and
- 3) Innovative ATC courses have received required prior approval from TEA.

**All ATC statewide-articulated courses also should be noted with the “A” special explanation course code on high school transcripts.**

# ATC Statewide-Articulated Courses PEIMS Course Codes from Table #C022 Updated March 3, 2004

<b>Grades 11-12, Career and Technology Education - Technical Placement</b>	
	<p>The following codes are the Texas Education Agency (TEA) career and technology courses approved for statewide-articulated postsecondary credit at community and technical colleges. These codes may only be used by districts that adhere to the teacher staff development and course content requirements outlined by TEA and the Texas Higher Education Coordinating Board in the <b>Advanced Technical Credit (ATC) Standard Articulation Agreement for Award of Postsecondary Credit for Commonly Articulated Technical Education Courses</b>. To indicate technical placement (TP) courses on a student's AAR, use special course explanation code "A."</p> <p>To be eligible for postsecondary credit as a single course, the student must be in grade 11 or 12. Courses in a coherent sequence may be taken at any grade level (9-12) as long as the final course in the <b>ATC-required</b> coherent sequence is taken when the student is in grade 11 or 12.</p>
